ABUBAKAR MOHAMMED BAKAR

Junior Node.js Backend / Full-Stack Developer

Beppu, Oita, Japan | +81 90 7383 9561 | abubakarmohaa2002@gmail.com
LinkedIn | GitHub | Portfolio

Computer Science graduate with a cybersecurity academic background and project experience in React, Node.js, Express and MongoDB. Seeking a junior backend or full-stack development role in Japan.

EDUCATION

Albukhary International University Oct 2021 - Nov 2024

Bachelor of Computer Science (Honours) | Alor Setar, Malaysia

CGPA: 3.52/4.00 | Second Class Honours, Upper Division

Coursework: Secured Software Development, Digital Forensics, Cybersecurity Risk Management.

Ritsumeikan Asia Pacific University Sep 2024 - Present

Bachelor of Sustainability and Tourism | Beppu, Japan

Currently enrolled | Expected graduation: Sep 2028 | English-basis program

PROJECTS

Task Manager App 2026

React, Node.js, Express, MongoDB | Source code

- Customized and deployed a React, Node.js and Express task manager with MongoDB, JWT authentication and per-user task ownership.
- Removed user documents from authentication responses to prevent password-hash exposure; added three automated regression tests.
- Added 22 permission tests using isolated MongoDB; the combined 25-test suite passed on Linux and Windows.

Personal Portfolio Website 2026

React, JavaScript, styled-components | Source code | Live site

- Customized a React portfolio to present projects, technical skills and contact details.
- Improved page layout and mobile navigation; checked desktop and mobile layouts before deploying updates on Vercel.

Decentralised Voting System Using Blockchain Technology 2024

Final-year project, Albukhary International University | Solidity, React, Hardhat

- Implemented a tutorial-guided voting prototype covering voter and candidate registration and vote casting.
- Documented the prototype's architecture and workflows in the final-year report.

EXPERIENCE

Industrial Placement Apr 2024 - Sep 2024

Puncak Perkhidmatan Kompleks Sdn. Bhd. | Alor Setar, Kedah, Malaysia

- Contributed to a team WordPress website project, including theme customization and plugin configuration.
- Performed general data entry.

TECHNICAL SKILLS

Frontend: JavaScript, HTML, CSS, React, Tailwind CSS, styled-components

Backend: Node.js, Express, MongoDB, Mongoose, REST APIs, JWT authentication

Tools: Git, GitHub, Vercel, Render, WordPress
